

EUCALYPTUS

EUCALIPTO

FACT SHEET

SPECIES IN A NUTSHELL

SCIENTIFIC NAME

Eucalyptus grandis

JANKA HARDNESS

1,420 lbf (6,330 N)

WEIGHT (DRIED)

750kg/M3

COMMON USES

Paper Industry / Furniture /
Flooring / Panels/ Civil
Construction / Pallets

USUALLY

Logs
Rough Sawn
S4S
AD or KD

AVAILABLE AS

EUCALYPTUS

EUCALIPTO

Scientific Name:
Eucalyptus urograndis (Eucalyptus grandis x E. urophylla hybrid)

Distribution:
Grown on plantations in Brazil

Color/Appearance:
Color ranges from a lighter salmon pink to a darker brownish red. Appearance has been likened to both Black Cherry and Honduran Mahogany. Color tends to deepen with age.

Grain/Texture:
Has a medium texture and small to medium sized open pores. The grain tends to be straight and even. Also, since the wood is grown and pruned on a plantation, there tends to be few knots or other abnormal grain patterns.

Endgrain:
Diffuse-porous; large to very large pores arranged in diagonal rows, few; exclusively solitary; tyloses occasionally present; growth rings indistinct; narrow rays usually not visible without lens, fairly close spacing; parenchyma vasicentric.

Workability:
Generally easy to work, though it can burn easily. Glues, stains, and finishes well.
